**Briefly, can you elaborate on how many data feeds you deal with and the underlying challenges in maintaining the number of feeds?**

# What are some challenges in obtaining and maintaining access to MLS Data feeds?

**Can you provide some  
pain points and best  
practices for  
communication between  
entities?**

**Technically speaking, what are some common issues with the way vendors pull data that can lead to negative results, and how can these pitfalls be avoided?**

**Will Data Dictionary or Web API adoption help alleviate any of these pain points?**
