RESO Web API 1.0.2
Implementation Panel

Scott Petronis
Panel

• Ashish Antal – MLS Listings

• Rob Larson – CRMLS

• Mahesh Nair – Innovation Incubator
Provide potential implementers of the Web API with a realistic view of what it takes

GOAL
What was the biggest hurdle you encountered during your implementation?
What technologies did you choose? Any why did you make those choices?
Can you give us a sense of the level of effort? Putting in context of your specific circumstances.
What piece of advice do you have for those just starting the process?
Bonus

What is the airspeed velocity of an unladen swallow?
