

StandardName	Element	Attribute	Type	Value	Description	Default	Known As	Parent Container
School.Primary	Primary		Text		The name of the primary school having a catchment area that includes the associated property.			SchoolData
School.JrHigh	JrHigh		Text		The name of the jr high school having a catchment area that includes the associated property.			SchoolData
BedRoom	BedRoom		Container		Information about specific bedrooms within a single-family property or a single unit of a multi-family property.			Rooms
BedRoom.Master	MasterBedroom		Container		The Geometric description of a Master Bedroom within a single-family property or a single unit of a multi-family property. The definition of a master bedroom is determined by local custom.			BedRoom
BedRoom.Master.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
BedRoom.Master.Dimensions	Dimensions		Text		The room dimensions. This SHOULD be expressed as a text string consisting of one or more numeric quantities giving the linear distance between vertices of the polygon enclosing the space and separated by white-space and the letter "x".			MasterBedroom
BedRoom.Master.Length	Length		Numeric		The rooms length. Represented as a number.			MasterBedroom
BedRoom.Master.Length.Units		Units	Enumeration	Feet	The length is expressed in feet.	Feet		
				Meters	The length is expressed in meters.			
				Acres	The length is expressed in acres.			
				Hectares	The length is expressed in hectares.			
BedRoom.Master.Width	Width		Numeric		The rooms width. Represented as a number.			MasterBedroom
BedRoom.Master.Width.Units		Units	Enumeration	Feet	The length is expressed in feet.	Feet		
				Meters	The length is expressed in meters.			
				Acres	The length is expressed in acres.			
				Hectares	The length is expressed in hectares.			
BedRoom.Master.Area	Area		Text		The rooms geometric area expressed in the given units. Numeric areas are preferred; the "TEXT" unit is deprecated.			MasterBedroom
BedRoom.Master.Area.Units		Units	Enumeration	SqFeet	An area measurement specified as per SqFeet.	SqFeet		
				SqMeters	An area measurement specified as per SqMeters.			
				Acres	An area measurement specified as per Acres.			
				Hectares	An area measurement specified as per Hectares.			
BedRoom.Master.Area.Type		Type	Enumeration	Integer	The area is expressed as an integer number of units.	Integer		
				Float	The area is expressed as a floating point number.			
				Text	The area is expressed as a text string that can not be usefully interpreted as a number.			
BedRoom.MainFloor	MainFloorBedroom		Container		The Geometric description of a bedroom (that resides on the main floor) within a single-family property or a single unit of a multi-family property. The definition of a main floor bedroom is determined by local custom.			BedRoom
BedRoom.MainFloor.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
BedRoom.MainFloor.Dimensions	Dimensions		Text		The room dimensions. This SHOULD be expressed as a text string consisting of one or more numeric quantities giving the linear distance between vertices of the polygon enclosing the space and separated by white-space and the letter "x".			MainFloorBedroom
BedRoom.MainFloor.Length	Length		Numeric		The rooms length. Represented as a number.			MainFloorBedroom
BedRoom.MainFloor.Length.Units		Units	Enumeration	Feet	The length is expressed in feet.	Feet		
				Meters	The length is expressed in meters.			
				Acres	The length is expressed in acres.			
				Hectares	The length is expressed in hectares.			
BedRoom.MainFloor.Width	Width		Numeric		The rooms width. Represented as a number.			MainFloorBedroom
BedRoom.MainFloor.Width.Units		Units	Enumeration	Feet	The length is expressed in feet.	Feet		
				Meters	The length is expressed in meters.			
				Acres	The length is expressed in acres.			
				Hectares	The length is expressed in hectares.			
BedRoom.MainFloor.Area	Area		Text		The rooms geometric area expressed in the given units. Numeric areas are preferred; the "TEXT" unit is deprecated.			MainFloorBedroom
BedRoom.MainFloor.Area.Units		Units	Enumeration	SqFeet	An area measurement specified as per SqFeet.	SqFeet		
				SqMeters	An area measurement specified as per SqMeters.			
				Acres	An area measurement specified as per Acres.			
				Hectares	An area measurement specified as per Hectares.			
BedRoom.MainFloor.Area.Type		Type	Enumeration	Integer	The area is expressed as an integer number of units.	Integer		
				Float	The area is expressed as a floating point number.			
				Text	The area is expressed as a text string that can not be usefully interpreted as a number.			
BathRoom	BathRoom		Container		The bath room within a single-family property or a single unit of a multi-family property. The definition of a master bedroom is determined by local custom.			Rooms
Bathroom.MainFloor	MainFloorBathroom		Container		The container for a bathroom (that resides on the main floor) within a single-family property or a single unit of a multi-family property. The definition of a main floor bathroom is determined by local custom.			BathRoom
Bathroom.MainFloor.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			

StandardName	Element	Attribute	Type	Value	Description	Default	Known As	Parent Container
School.Primary	Primary		Text		The name of the primary school having a catchment area that includes the associated property.			SchoolData
Bathroom.MainFloor.Size	Size		Enumeration	Full	The bath room is a full bath room	Full		MainFloorBathroom
				Half	The bath room is a half bath room			
				ThreeQuarter	The bath room is a three quarter bath room			
Rooms.Den	Den		Container		The Geometric description of a Den within a single-family property or a single unit of a multi-family property. The definition of a Den is determined by local custom.			Rooms
Rooms.Den.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
Rooms.Den.Dimensions	Dimensions		Text		The room dimensions. This SHOULD be expressed as a text string consisting of one or more numeric quantities giving the linear distance between vertices of the polygon enclosing the space and separated by white-space and the letter "x".			Den
Rooms.Den.Length	Length		Numeric		The rooms length. Represented as a number.			Den
Rooms.Den.Length.Units		Units	Enumeration	Feet	The length is expressed in feet.	Feet		
				Meters	The length is expressed in meters			
				Acres	The length is expressed in acres.			
				Hectares	The length is expressed in hectares			
Rooms.Den.Width	Width		Numeric		The rooms width. Represented as a number.			Den
Rooms.Den.Width.Units		Units	Enumeration	Feet	The length is expressed in feet.	Feet		
				Meters	The length is expressed in meters			
				Acres	The length is expressed in acres.			
				Hectares	The length is expressed in hectares			
Rooms.Den.Area	Area		Text		The rooms geometric area expressed in the given units. Numeric areas are preferred; the "TEXT" unit is deprecated.			Den
Rooms.Den.Area.Units		Units	Enumeration	SqFeet	An area measurement specified as per SqFeet.	SqFeet		
				SqMeters	An area measurement specified as per SqMeters.			
				Acres	An area measurement specified as per Acres.			
				Hectares	An area measurement specified as per Hectares.			
Rooms.Den.Area.Type		Type	Enumeration	Integer	The area is expressed as an integer number of units	Integer		
				Float	The area is expressed as a floating point number.			
				Text	The area is expressed as a text string that can not be usefully interpreted as a number.			
Rooms.Office	Office		Container		The Geometric description of an Office within a single-family property or a single unit of a multi-family property. The definition of an Office is determined by local custom.			Rooms
Rooms.Office.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
Rooms.Office.Dimensions	Dimensions		Text		The room dimensions. This SHOULD be expressed as a text string consisting of one or more numeric quantities giving the linear distance between vertices of the polygon enclosing the space and separated by white-space and the letter "x".			Office
Rooms.Office.Length	Length		Numeric		The rooms length. Represented as a number.			Office
Rooms.Office.Length.Units		Units	Enumeration	Feet	The length is expressed in feet.	Feet		
				Meters	The length is expressed in meters			
				Acres	The length is expressed in acres.			
				Hectares	The length is expressed in hectares			
Rooms.Office.Width	Width		Numeric		The rooms width. Represented as a number.			Office
Rooms.Office.Width.Units		Units	Enumeration	Feet	The length is expressed in feet.	Feet		
				Meters	The length is expressed in meters			
				Acres	The length is expressed in acres.			
				Hectares	The length is expressed in hectares			
Rooms.Office.Area	Area		Text		The rooms geometric area expressed in the given units. Numeric areas are preferred; the "TEXT" unit is deprecated.			Office
Rooms.Office.Area.Units		Units	Enumeration	SqFeet	An area measurement specified as per SqFeet.	SqFeet		
				SqMeters	An area measurement specified as per SqMeters.			
				Acres	An area measurement specified as per Acres.			
				Hectares	An area measurement specified as per Hectares.			
Rooms.Office.Area.Type		Type	Enumeration	Integer	The area is expressed as an integer number of units	Integer		
				Float	The area is expressed as a floating point number.			
				Text	The area is expressed as a text string that can not be usefully interpreted as a number.			
Rooms.Kitchen	Kitchen		Container		The Geometric description of a kitchen within a single-family property or a single unit of a multi-family property. The definition of a kitchen is determined by local custom.			Rooms
Rooms.Kitchen.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
Rooms.Kitchen.Dimensions	Dimensions		Text		The room dimensions. This SHOULD be expressed as a text string consisting of one or more numeric quantities giving the linear distance between vertices of the polygon enclosing the space and separated by white-space and the letter "x".			Kitchen
Rooms.Kitchen.Length	Length		Numeric		The rooms length. Represented as a number.			Kitchen
Rooms.Kitchen.Length.Units		Units	Enumeration	Feet	The length is expressed in feet.	Feet		
				Meters	The length is expressed in meters			

StandardName	Element	Attribute	Type	Value	Description	Default	Known As	Parent Container
School.Primary	Primary		Text		The name of the primary school having a catchment area that includes the associated property.			SchoolData
				Acres	The length is expressed in acres.			
				Hectares	The length is expressed in hectares			
Rooms.Kitchen.Width	Width		Numeric		The rooms width. Represented as a number.			Kitchen
Rooms.Kitchen.Width.Units		Units	Enumeration	Feet	The length is expressed in feet.	Feet		
				Meters	The length is expressed in meters			
				Acres	The length is expressed in acres.			
				Hectares	The length is expressed in hectares			
Rooms.Kitchen.Area	Area		Text		The rooms geometric area expressed in the given units. Numeric areas are preferred; the "TEXT" unit is deprecated.			Kitchen
Rooms.Kitchen.Area.Units		Units	Enumeration	SqFeet	An area measurement specified as per SqFeet.	SqFeet		
				SqMeters	An area measurement specified as per SqMeters.			
				Acres	An area measurement specified as per Acres.			
				Hectares	An area measurement specified as per Hectares.			
Rooms.Kitchen.Area.Type		Type	Enumeration	Integer	The area is expressed as an integer number of units	Integer		
				Float	The area is expressed as a floating point number.			
				Text	The area is expressed as a text string that can not be usefully interpreted as a number.			
Rooms.Game	GameRoom		Container		The Geometric description of a game room within a single-family property or a single unit of a multi-family property. The definition of a game room is determined by local custom.			Rooms
Rooms.Game.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
Rooms.Game.Dimensions	Dimensions		Text		The room dimensions. This SHOULD be expressed as a text string consisting of one or more numeric quantities giving the linear distance between vertices of the polygon enclosing the space and separated by white space and the letter "x".			GameRoom
Rooms.Game.Length	Length		Numeric		The rooms length. Represented as a number.			GameRoom
Rooms.Game.Length.Units		Units	Enumeration	Feet	The length is expressed in feet.	Feet		
				Meters	The length is expressed in meters			
				Acres	The length is expressed in acres.			
				Hectares	The length is expressed in hectares			
Rooms.Game.Width	Width		Numeric		The rooms width. Represented as a number.			GameRoom
Rooms.Game.Width.Units		Units	Enumeration	Feet	The length is expressed in feet.	Feet		
				Meters	The length is expressed in meters			
				Acres	The length is expressed in acres.			
				Hectares	The length is expressed in hectares			
Rooms.Game.Area	Area		Text		The rooms geometric area expressed in the given units. Numeric areas are preferred; the "TEXT" unit is deprecated.			GameRoom
Rooms.Game.Area.Units		Units	Enumeration	SqFeet	An area measurement specified as per SqFeet.	SqFeet		
				SqMeters	An area measurement specified as per SqMeters.			
				Acres	An area measurement specified as per Acres.			
				Hectares	An area measurement specified as per Hectares.			
Rooms.Game.Area.Type		Type	Enumeration	Integer	The area is expressed as an integer number of units	Integer		
				Float	The area is expressed as a floating point number.			
				Text	The area is expressed as a text string that can not be usefully interpreted as a number.			
Rooms.Laundry	LaundryRoom		Container		The Geometric description of a laundry room within a single-family property or a single unit of a multi-family property. The definition of a laundry room is determined by local custom.			Rooms
Rooms.Laundry.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
Rooms.Laundry.Dimensions	Dimensions		Text		The room dimensions. This SHOULD be expressed as a text string consisting of one or more numeric quantities giving the linear distance between vertices of the polygon enclosing the space and separated by white space and the letter "x".			LaundryRoom
Rooms.Laundry.Length	Length		Numeric		The rooms length. Represented as a number.			LaundryRoom
Rooms.Laundry.Length.Units		Units	Enumeration	Feet	The length is expressed in feet.	Feet		
				Meters	The length is expressed in meters			
				Acres	The length is expressed in acres.			
				Hectares	The length is expressed in hectares			
Rooms.Laundry.Width	Width		Numeric		The rooms width. Represented as a number.			LaundryRoom
Rooms.Laundry.Width.Units		Units	Enumeration	Feet	The length is expressed in feet.	Feet		
				Meters	The length is expressed in meters			
				Acres	The length is expressed in acres.			
				Hectares	The length is expressed in hectares			
Rooms.Laundry.Area	Area		Text		The rooms geometric area expressed in the given units. Numeric areas are preferred; the "TEXT" unit is deprecated.			LaundryRoom
Rooms.Laundry.Area.Units		Units	Enumeration	SqFeet	An area measurement specified as per SqFeet.	SqFeet		
				SqMeters	An area measurement specified as per SqMeters.			
				Acres	An area measurement specified as per Acres.			

StandardName	Element	Attribute	Type	Value	Description	Default	Known As	Parent Container
School.Primary	Primary		Text		The name of the primary school having a catchment area that includes the associated property.			SchoolData
				Hectares	An area measurement specified as per Hectares.			
Rooms.Laundry.Area.Type		Type	Enumeration	Integer	The area is expressed as an integer number of units	Integer		
				Float	The area is expressed as a floating point number.			
				Text	The area is expressed as a text string that can not be usefully interpreted as a number.			
Property	Property		Container		A container for all features specific to a property. These include the land, and all permanent buildings and structures on it. May apply to a single-family property or a single unit of a multi-family property.			ResidentialProperty, MultiFamily
Property.Age	Age		Numeric		Numeric age (represented in years) for a property			Property
Property.HorseFacilities	HorseFacilities		Text		Text description of the horse facilities that exist with the associated property			Property
Property.HorseFacilities.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
Property.HotTub	HotTub		Text		Text description of the hot tub that exist with the associated property			Property
Property.HotTub.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
Property.TennisCourt	TennisCourt		Text		Text description of the tennis courts that exist with the associated property			Property
Property.TennisCourt.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
Property.Inclusions	Inclusions		Text		Text description of inclusions that come with the listed property. Examples of inclusions are Stoves, Microwave-ovens, Disposals, Refrigerators, Trash compactor, etc.			Property
Property.Energy.Information	EnergyInformation		Text		A text description of the properties energy information.			Property
Property.Construction.Material	ConstructionMaterial		Text		A text description of the properties construction material.			Property
Property.Disability.Features	DisabilityFeatures		Text		Text description of the disability features that exist with the associated property			Property
Property.Disability.Features.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
Property.Security.Features	SecurityFeatures		Text		A text description of the community Security Features.			Property
Property.Security.Features.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
Property.Type	PropertyType		Container		A container for all information specific to the Property Type			Property
Property.Type.Rental	Rental		Boolean		Yes ("1") indicates that this property is a rental. No ("0") indicates that this property is not a rental.	1		PropertyType
Property.Type.Farm	Farm		Boolean		Yes ("1") indicates that this property is a farm No ("0") indicates that this property is not a farm	1		PropertyType
Property.Type.Condo	Rental		Boolean		Yes ("1") indicates that this property is a rental. No ("0") indicates that this property is not a rental.	1		PropertyType
Property.Type.TownHouse	Farm		Boolean		Yes ("1") indicates that this property is a farm No ("0") indicates that this property is not a farm	1		PropertyType
Animal.Policy	AnimalPolicy		Container		A container for all information specific to animal policies associated with the property. May apply to a single-family property or a single unit of a multi-family property. The specific definition of is determined by local custom.			Property
Animal.Policy.Permitted	AnimalsPermitted		Indicator		Yes indicates that this property allows animals of some type. "No" indicates that no animals of any type are allowed. "Unknown" indicates that neither condition can be determined.	Unknown	PetsAllowed	AnimalPolicy
Animal.Policy.Permitted.Types	PermittedTypes		Text		A text list of the permitted types of animals.			AnimalPolicy
Animal.Policy.Permitted.WeightLimit	WeightLimit		Numeric		A weight restriction on animals allowed. This is a numeric value expressed in the given units and represents the maximum weight allowed.			AnimalPolicy
Animals.Policy.Weight.Limit.Units		Units	Enumeration	lbs	The weight limit is in pounds	lbs		
				kilo	The weight limit is in kilograms			
LotData	LotData		Container		A container for all information specific to defining the lot of a property. May apply to a single-family property or a single unit of a multi-family property. The specific definition of is determined by local custom.			Property
LotData.CornetLot	CornetLot		Text		A text description of the corner lot			LotData
LotData.CornetLot.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
LotData.CuldeSac	CuldeSac		Text		A text description of the Cul-de-Sac			LotData
LotData.CuldeSac.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
LotData.GolfCourseLot	GolfCourseLot		Text		A text description of the Golf Course Lot			LotData
LotData.GolfCourseLot.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			

StandardName	Element	Attribute	Type	Value	Description	Default	Known As	Parent Container
School.Primary	Primary		Text		The name of the primary school having a catchment area that includes the associated property.			SchoolData
FirePlace	FirePlace		Container		A container for all information specific to defining the fireplaces of a property. May apply to a single-family property or a single unit of a multi-family property. The specific definition of is determined by local custom.			Property
FirePlace.FuelType	FirePlaceFuelType		Text		Refers to Fuel-Type. There are generally three types of fuel that fireplaces can use to produce heat and light: gas, electric, and wood.			FirePlace
FirePlace.Details	FirePlaceDetails		Text		Text description of the fireplace (e.g. brick, timber, stone, marble, mantle shelf) that exist with the associated property			FirePlace
Floors	Floors		Container		A container for all information specific to defining the floors of a property. May apply to a single-family property or a single unit of a multi-family property. The specific definition of is determined by local custom.			Property
Floors.Hardwood	HardwoodFloors		Text		A text description of the hardwood floors.			Floors
Floors.Hardwood.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
ViewData	ViewData		Container		A container for all information specific to defining the view of a property. May apply to a single-family property or a single unit of a multi-family property. The specific definition of is determined by local custom.			Property
ViewData.CityLights	CityLights		Text		A text description of the city lights view.			ViewData
ViewData.CityLights.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
ViewData.Mountain	Mountain		Text		A text description of the mountain view.			ViewData
ViewData.Mountain.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
ViewData.Ocean	Ocean		Text		A text description of the ocean view.			ViewData
ViewData.Ocean.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
ViewData.River	River		Text		A text description of the river view.			ViewData
ViewData.River.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
ViewData.Lake	Lake		Text		A text description of the lake view.			ViewData
ViewData.Lake.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
ViewData.GolfCourse	GolfCourse		Text		A text description of the golf course view.			ViewData
ViewData.GolfCourse.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
ViewData.Water	Water		Text		A text description of the water view			ViewData
ViewData.Water.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
Community	Community		Container		A container for all information specific to defining the Community. May apply to a single-family property or a single unit of a multi-family property. The specific definition of is determined by local custom.			Property
Community.CommunityName	CommunityName		Text		The name of the community.			Community
Community.ClubHouse	ClubHouse		Text		The name and possible description of the Club House			Community
Community.ClubHouse.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
Community.ExerciseArea	ExerciseArea		Text		A text description of the community Exercise Area.			Community
Community.ExerciseArea.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
Community.Golf	Golf		Text		A text description of the community Golf Course			Community
Community.Golf.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
Community.Tennis	Tennis		Text		A text description of the community Tennis Courts.			Community
Community.Tennis.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
Community.RecreationalFacilities	RecreationalFacilities		Text		A text description of the community Recreational Facilities.			Community
Community.RecreationalFacilities.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			

StandardName	Element	Attribute	Type	Value	Description	Default	Known As	Parent Container
School.Primary	Primary		Text		The name of the primary school having a catchment area that includes the associated property.			SchoolData
Community.SecurityFeatures	SecurityFacilities		Text		A text description of the community Security Features.			Community
Community.SecurityFeatures.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
Community.SeniorCommunity	SeniorCommunity		Text		A text description of the Senior Community.			Community
Community.SeniorCommunity.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
Community.HotTub	HotTub		Text		A text description of the community Hot Tub.			Community
Community.HotTub.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
Community.Pool	Pool		Text		A text description of the community Pool.			Community
Community.Pool.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
Community.BoatFacilities	BoatFacilities		Text		A text description of the community Boat Facilities.			Community
Community.BoatFacilities.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
Community.HorseFacilities	HorseFacilities		Text		A text description of the community Horse Facilities.			Community
Community.HorseFacilities.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
Community.CommunityPark	CommunityPark		Text		A text description of the Community Park.			Community
Community.CommunityPark.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
DisplayData	DisplayData		Container		A container for information specific to agent or office defined display rules for the listing. May apply to a single-family property or a single unit of a multi-family property.			Listing
DisplayData.DisplayFlag.Listing	DisplayFlagListing		Boolean		A boolean value. "Yes" (1) indicates that this listing may be displayed (with no restrictions) on public access sites or systems. "No" (0) indicated that this listing may NOT be displayed for any reason on public access sites or systems.	1		DisplayData
DisplayData.DisplayFlag.Address	DisplayFlagAddress		Boolean		A boolean value. "Yes" (1) indicates that this listings address may be displayed (with no restrictions) on public access sites or systems. "No" (0) indicated that this listings address may NOT be displayed for any reason on public access sites or systems.	1		DisplayData
FinancialData	FinancialData		Container		A container for all information specific to defining the financial features and options associated with the listing.			ListingData
FinancialData.Lease	Lease		Container		A container for all information specific to a lease			FinancialData
FinancialData.Lease.Option	LeaseOption		Text		Text description & details of the Lease and terms of the Lease.			Lease
FinancialData.Lease.Option.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
FinancialData.Trade	Trade		Container		A container for all information specific to a Trade			FinancialData
FinancialData.Trade.Option	TradeOption		Text		Text description of the Trade Option and terms of the trade.			Trade
FinancialData.Trade.Option.Indicator		Indicator	Enumeration	Unknown	Unknown indicates that neither condition (Yes or No) can be determined.	Unknown		
				Yes	Indicates that this feature does exist.			
				No	Indicates that this feature does not exist.			
FinancialData.Rental	Rental		Container		A container for all information specific to a Rental			FinancialData
FinancialData.Rental.Amount	RentalAmount		Numeric		The monetary value for the Rental amount of the listing.			Rental
FinancialData.Rental.Amount.Type		Type	Enumeration	Integer	The rental amount is an integer.	Integer		
				Float	The rental amount is a float.			
FinancialData.Rental.Amount.CurrencyCode		CurrencyCode	Text		A valid "ISO" currency code.	USD		
FinancialData.Rental.Amount.Period		Period	Enumeration	Day	The Rental Amount period specified as per Day.	Month		
				Week	The Rental Amount period specified as per Week.			
				Month	The Rental Amount period specified as per Month.			
				Year	The Rental Amount period specified as per Year.			
FinancialData.Rental.Amount.Units		Units	Enumeration	SqFeet	A Rental Amount Unit measurement specified as per SqFeet.	SqFeet		
				SqMeters	A Rental Amount Unit measurement specified as per SqMeters.			
				Acres	A Rental Amount Unit measurement specified as per Acres.			
				Hectares	A Rental Amount Unit measurement specified as per Hectares.			
LotSize.Range	LotSizeRange		Text		A text representation of a specified range in area for a lot (e.g. 4 - 6). This SHOULD be expressed as a text string consisting of one or more numeric quantities and separated by white space and the letter "-".			LotSize
LotSize.Range.Units		Units	Enumeration	SqFeet	A lot range measurement specified as per SqFeet.	SqFeet		
				SqMeters	A lot range measurement specified as per SqMeters			
				Acres	A lot range measurement specified as per Acres			
				Hectares	A lot range measurement specified as per Hectares.			
LotSize.Width.Units		Units	Enumeration	Feet	The lot size width is specified in Feet	Feet		

StandardName	Element	Attribute	Type	Value	Description	Default	Known As	Parent Container
School.Primary	Primary		Text		The name of the primary school having a catchment area that includes the associated property.			SchoolData
				Meters	The lot size width is specified in Meters			
				Acres	The lot size width is specified in Acres			
				Hectares	The lot size width is specified in Hectares			
DiningRoomWidth.Units		Units	Enumeration	Feet	The Dining Room width is specified in Feet	Feet		
				Meters	The Dining Room width is specified in Meters			
				Acres	The Dining Room width is specified in Acres			
				Hectares	The Dining Room width is specified in Hectares			
LivingRoomWidth.Units		Units	Enumeration	Feet	The Living Room width is specified in Feet	Feet		
				Meters	The Living Room width is specified in Meters			
				Acres	The Living Room width is specified in Acres			
				Hectares	The Living Room width is specified in Hectares			
FamilyRoomWidth.Units		Units	Enumeration	Feet	The Family Room width is specified in Feet	Feet		
				Meters	The Family Room width is specified in Meters			
				Acres	The Family Room width is specified in Acres			
				Hectares	The Family Room width is specified in Hectares			
BasementWidth.Units		Units	Enumeration	Feet	The Basement width is specified in Feet	Feet		
				Meters	The Basement width is specified in Meters			
				Acres	The Basement width is specified in Acres			
				Hectares	The Basement width is specified in Hectares			
LotSizeLength.Units		Units	Enumeration	Feet	The lot size length is specified in Feet	Feet		
				Meters	The lot size length is specified in Meters			
				Acres	The lot size length is specified in Acres			
				Hectares	The lot size length is specified in Hectares			
DiningRoomLength.Units		Units	Enumeration	Feet	The Dining Room length is specified in Feet	Feet		
				Meters	The Dining Room length is specified in Meters			
				Acres	The Dining Room length is specified in Acres			
				Hectares	The Dining Room length is specified in Hectares			
LivingRoomLength.Units		Units	Enumeration	Feet	The Living Room length is specified in Feet	Feet		
				Meters	The Living Room length is specified in Meters			
				Acres	The Living Room length is specified in Acres			
				Hectares	The Living Room length is specified in Hectares			
FamilyRoomLength.Units		Units	Enumeration	Feet	The Family Room length is specified in Feet	Feet		
				Meters	The Family Room length is specified in Meters			
				Acres	The Family Room length is specified in Acres			
				Hectares	The Family Room length is specified in Hectares			
BasementLength.Units		Units	Enumeration	Feet	The Basement length is specified in Feet	Feet		
				Meters	The Basement length is specified in Meters			
				Acres	The Basement length is specified in Acres			
				Hectares	The Basement length is specified in Hectares			
Agent.Phone.Primary	PrimaryPhone		Text		The Primary phone of the Agent. This could be any of the office cell or home number.			ContactInformation
Agent.Phone.Alternate	AlternatePhone		Text		The Alternate phone of the Agent. This could be any of the office, cell or home number.			ContactInformation
ListAgent.Phone.Primary	PrimaryPhone		Text		The Primary phone of the List Agent. This could be any of the office cell or home number.			ContactInformation
ListAgent.Phone.Alternate	AlternatePhone		Text		The Alternate phone of the List Agent. This could be any of the office, cell or home number.			ContactInformation
SalesAgent.Phone.Primary	PrimaryPhone		Text		The Primary phone of the Sales Agent. This could be any of the office cell or home number.			ContactInformation
SalesAgent.Phone.Alternate	AlternatePhone		Text		The Alternate phone of the Sales Agent. This could be any of the office, cell or home number.			ContactInformation
Office.Phone.Primary	PrimaryPhone		Text		The Primary phone of the Office. This could be any of the office, cell or home number.			ContactInformation
Office.Phone.Alternate	AlternatePhone		Text		The Alternate phone of the Office. This could be any of the office, cell or home number.			ContactInformation
ListOffice.Phone.Primary	PrimaryPhone		Text		The Primary phone of the List Office. This could be any of the office, cell or home number.			ContactInformation
ListOffice.Phone.Alternate	AlternatePhone		Text		The Alternate phone of the List Office. This could be any of the office, cell or home number.			ContactInformation
SalesOffice.Phone.Primary	PrimaryPhone		Text		The Primary phone of the Sales Office. This could be any of the office, cell or home number.			ContactInformation
SalesOffice.Phone.Alternate	AlternatePhone		Text		The Alternate phone of the Sales Office. This could be any of the office, cell or home number.			ContactInformation
Parking.Total	TotalParking		Numeric		The numeric value of the total parking spaces. This could include the sum of garages, carports, openparking, etc.			Parking
Parking.Total.Operator		Operator	Enumeration	+	Extends the numerical value for the TotalParking element, SHOULD only be used when systems can not provide the true numerical value. The "+" Indicates greater-than.	+		
				-	Extends the numerical value for the TotalParking element, SHOULD only be used when systems can not provide the true numerical value. The "-" Indicates less-than.			
Listing.Price.LowAmount	ListPriceLow	Numeric			The low range of the listing Price			ListingData
		Type	Enumeration	Integer	The price is an integer	Integer		
				Float	The price in a float			

StandardName	Element	Attribute	Type	Value	Description	Default	Known As	Parent Container
School.Primary	Primary		Text		The name of the primary school having a catchment area that includes the associated property.			SchoolData
Listing.Price.LowAmount.CurrencyCode		CurrencyCode	Text		The valid ISO currency code for the price	USD		
Listing.Price.HighAmount	ListPriceHigh	Numeric			The high range of the listing Price			ListingData
		Type	Enumeration	Integer	The price is an integer	Integer		
				Float	The price in a float			
Listing.Price.HighAmount.CurrencyCode		CurrencyCode	Text		The Valid ISO currency code for the price	USD		
ListPrice.Units		Units	Enumeration	SqFeet	The Price amount is specified as per SqFeet.	SqFeet		
				SqMeters	The Price amount is specified as per SqMeters.			
				Acres	The Price amount is specified as per Acres.			
				Hectares	The Price amount is specified as per Hectares.			
Beds.Operator		Operator	Enumeration	+	Extends the numerical value for the bed rooms element, SHOULD only be used when systems can not provide the true numerical value. The "+" Indicates greater-then.	+		
				-	Extends the numerical value for the bed rooms element, SHOULD only be used when systems can not provide the true numerical value. The "-" Indicates less-then.			
Baths.Operator		Operator	Enumeration	+	Extends the numerical value for the baths element, SHOULD only be used when systems can not provide the true numerical value. The "+" Indicates greater-then.	+		
				-	Extends the numerical value for the baths element, SHOULD only be used when systems can not provide the true numerical value. The "-" Indicates less-then.			
Garage.Operator		Operator	Enumeration	+	Extends the numerical value for the Garage element, SHOULD only be used when systems can not provide the true numerical value. The "+" Indicates greater-then.	+		
				-	Extends the numerical value for the Garage element, SHOULD only be used when systems can not provide the true numerical value. The "-" Indicates less-then.			
Carport.Operator		Operator	Enumeration	+	Extends the numerical value for the Carport element, SHOULD only be used when systems can not provide the true numerical value. The "+" Indicates greater-then.	+		
				-	Extends the numerical value for the Carport element, SHOULD only be used when systems can not provide the true numerical value. The "-" Indicates less-then.			
OpenParking.Operator		Operator	Enumeration	+	Extends the numerical value for the OpenParking element, SHOULD only be used when systems can not provide the true numerical value. The "+" Indicates greater-then.	+		
				-	Extends the numerical value for the OpenParking element, SHOULD only be used when systems can not provide the true numerical value. The "-" Indicates less-then.			
CoveredParking.Operator		Operator	Enumeration	+	Extends the numerical value for the Covered Parking element, SHOULD only be used when systems can not provide the true numerical value. The "+" Indicates greater-then.	+		
				-	Extends the numerical value for the Covered Parking element, SHOULD only be used when systems can not provide the true numerical value. The "-" Indicates less-then.			
Stories.Operator		Operator	Enumeration	+	Extends the numerical value for the Stories element, SHOULD only be used when systems can not provide the true numerical value. The "+" Indicates greater-then.	+		
				-	Extends the numerical value for the Stories element, SHOULD only be used when systems can not provide the true numerical value. The "-" Indicates less-then.			
FirePlaces.Operator		Operator	Enumeration	+	Extends the numerical value for the FirePlaces element, SHOULD only be used when systems can not provide the true numerical value. The "+" Indicates greater-then.	+		
				-	Extends the numerical value for the FirePlaces element, SHOULD only be used when systems can not provide the true numerical value. The "-" Indicates less-then.
