# RESO Web API Transport

- The RESO Web API is the latest in data transportation technologies leveraging global technology standards
- Lightweight and designed to support product features and functions in a mobile environment
- Provides a faster and less expensive implementation model for products and services and lowers the barrier to entry for any new business in the real estate industry
- Provides MLS Data Access without requiring Data Replication
- <https://www.reso.org/reso-web-api/> for more standards information
- <https://www.reso.org/web-api-tools/> to download software
