Real Estate Data is typically delivered as a package comprised of a set of data for a specific business need. The RESO Data Dictionary defines all the fields (and their specific characteristics) available to be included in a payload. The Payloads Workgroup purpose is to define Payload Categories based upon Real Estate Industry business need and which fields are to be included in each Payload Category as specified within the RESO Data Dictionary.

Property Unique ID Workgroup

Chair

Mark Bessett

ARMLS

Sr. Research & Development Engineer

Charter

PUID will review and build from efforts from the U.S. government, public records industry and other data standards organizations to build the "definitive" standard for the Universal Property Identifier to be used by the real estate industry. The benefits of a Universal Property Identifier include: easier identification of parcels across market boundaries, unification of public records from multiple sources in one display, faster updates to physical property characteristics.

Data Dictionary Workgroup

Chair

Rob Larson

CRMLS

Chief Information Officer

Charter

The RESO Data Dictionary has two purposes. First is to serve as a non-RETS guideline for a national standard for the fields and lookups (enumerations) in the MLS. The second is as a common center for all expressions of fields and enumerations in the RETS standard. The workgroup purpose is to maintain and develop the Dictionary.

Data Dictionary Workgroup

Schedule
10:30am-12:00pm
Music City Ballroom

Agenda Highlights
- Data Dictionary Process Review
- December Onsite Enumerations Meeting
- Commercial PropertySubType
- Ownership / Structure & PropertySubType
- "[Type]" Enumerations
- Saved Searches, Contacts, Auto Email Relationships
- DD v1.6 BOD Strategic Objectives

Internet Tracking Workgroup

Chair

Chris Lambrou
Metro MLS
Chief Information Officer

Charter

Internet Tracking data is a key component for any modern day data set. No longer is having the data secure and readily available enough. True analytics that show value are now expected and commonplace in the software industry. This workgroup would propose a recommended standard for tracking RETS vendor activity, including the MLS listing.

RESO
