

RESO Broker Advisory Group

David Gumpper | Chair

The RESO Broker Advisory Group identifies issues facing brokers of all sizes, provides specific recommendations to the Board of Directors on opportunities to support the needs of the broker industry through standard creation and evolution, and promotes RESO as a driving force for the collective future of the industry.

Now for something completely different

RESO Event Catalog Workgroup

Event Catalog Charter

Business Intelligence, timeliness and efficiency are important to MLS participants.

Whereas the RESO Web API provides a signaling mechanism and the RESO Data Dictionary provides elemental definition, lifecycle events allow information to be consumed in a more natural form.

The purpose of the RESO Event Catalog workgroup is to identify and document property lifecycle events.

These events could be recorded in a distributed ledger by the industry participants to support accountability, provide instant notifications and identify rules/patterns that are valuable to real estate professionals.

The catalog will use RESO Data Dictionary fields wherever possible and utilizes the RESO Web API wherever possible.

The workgroup will work closely with other RESO workgroups to maintain alignment with their work.

Why should you care?

- Document the events in the lifecycle of a property
- Provide new data for the Data Dictionary
- Implement with distributed ledgers

Who is leading this?

- Mark Lesswing (NAR)
- Ashish Antal (MLSListings)
