

Michael Wurzer, CEO, FBS

Class B: Under \$25M annual revenue

1. What are the three most important priorities or initiatives that RESO should pursue during the next two years?

Improve the DD. As MLSs work to implement the large number of enumerations added in the last two versions of the DD, questions are arising that need addressing quickly.

Real-time Data Exchange. Continue working on encouraging implementation and improvement of real-time data exchange standards. Especially as more data shares are being implemented and front-end of choice is being explored, real-time data is critical to success for MLS organizations and their broker and agent members.

Media Update. Increase adoption of media update standards. Streamlining the process of getting media from photographers, photography networks, and others to the MLS will reduce costs, improve data quality, and increase licensing rights for MLSs and their members.

2. How do you see your contributions as a board member being utilized for realizing these priorities?

I'm a passionate advocate for improving standards to reduce costs and increase efficiency for MLSs and their broker, agent, and other members. I could even say it's been one of the great callings in my work life to advocate and motivate the industry forward on standards. I would love to continue to have the opportunity to do that work.

3. What is your current/past involvement in RESO Workgroups?

I'm proud to have been involved on multiple Work Groups and the RESO Board for the better part of the last two decades.

4. The Board meets regularly, via conference calls and in-person at conferences. Board members also are called to serve on or chair committees and special task forces. Are you willing and able to meet the time requirements to serve as a director for a two-year term?

Yes.
